REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art discloses a vacuum cleaner having an intake body with an intake opening for receiving a flow of air and particulates and at least two exit openings, a filter element to separate the particulates from the flow of air, at least one conduit coupled between the intake body and the filter element and an airflow propulsion device coupled between the intake opening and the at least conduit HOWEVER fails to disclose or fairly suggest the flow path formed by the intake opening, propulsion device and conduit having an approximately constant flow area from the intake opening to the propulsion device OR the flow path having a radius of curvature not less than approximately 0.29 inches to provide smooth flow along the flow path OR the at least one conduit being at least two conduits wherein the sum of the conduit flow areas is less than the intake flow area at the intake opening in order to accelerate flow through the conduits OR the at least one conduit being at least two conduits with a manifold in communication with the filter element and the conduits, with the manifold including a first portion coupled to a first conduit and a second portion coupled to a second conduit and the air flows in the two conduits merging in the manifold and provided to the filter element.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
